Applied Stochastic Models and Data Analysis

Contents

VOLUME 9 NUMBERS 1–4 1993

NUMBER 1

L. A. de BEJAR, P. F. ROBINSON AND R. R. AVENT
Stochastic Models for the Plastic Rotation Process in Heat Straightening of Damaged Steel Plates 1

D. NEOGI, R. NASSAR AND L. T. FAN
Fractional Brownian Motion Modelling of Pressure Fluctuations in Multiphase Flow Systems 19

I. I. GERONTIDIS
A Continuous Time Markov-renewal Replacement Model for Manpower Systems 39

M. NADIF AND G. GOVAERT
Binary Clustering with Missing Data 59

C. H. HESSE
On a Stochastic Model for Particle Sedimentation in Fluids 73

NUMBER 2

Special Issue on Manufacturing Systems

Editorial 85

X. XIE
Manufacturing Cell Formation Under Capacity Constraints 87

V. DAMODARAN, N. SINGH AND R. S. LASHKARI
Design of Cellular Manufacturing Systems with Refixturing Material Handling Considerations 97

A. BOUHCHOUCH, Y. FREIN AND Y. DALLERY
Analysis of a Closed-loop Manufacturing System with Finite Buffers 111

T. J. SAWIK
A Scheduling Algorithm for Flexible Flow Lines with Limited Intermediate Buffers 127

M.-O. HONGLER
Stochastic Dispersive Transport: An Excursion from Statistical Physics to Automated Production Line Design 139

P. C. SAMARATUNGA
A Language for Numerical Construction of Applied Stochastic Models via Redundant Data 153

G. MOUROT, F. KRATZ AND N. HERAUD
Unsupervised Learning Methodology: Application to Nuclear Power Plants 163

C. CHU AND M.-C. PORTMANN
Job-shop Scheduling to Minimize Total Waiting Time 177

Indexed or abstracted by Cambridge Scientific Abstracts, Current Index to Statistics, Engineering Index, Executive Sciences Institute, Mathematical Reviews, Statistical Theory and Method Abstracts, and Zentralblatt für Mathematik

NUMBER 3

Invited Paper
G. H. HARHALAKIS, J.-M. PROTH AND X.-L. XIE
A Comprehensive Approach of Planning and Scheduling Based on Petri Nets 187

M. CARBON AND M. DELECROIX
Non-parametric vs. Parametric Forecasting in Time Series: A Computational Point of View 215

P. PERRODO
Improving Scoring Techniques in Banking Applications 231

V. S. KOUIKOGLOU AND Y. A. PHILLIS
Minimax Design of Two-state *k*-out-of-*n* Systems 245

A. CSENKI
Sojourn Times with Finite Time-horizon in Finite Semi-Markov Processes 251

P. A. SCARF
On the Limiting Joint Distribution of the Extreme Order Statistics 267

NUMBER 4

L. TRALHÃO, J. CRAVEIRINHA AND J. PAIXÃO
A Stochastic System with MMPP Input and an Access Function 279

H. A. L. KIERS
The Exploratory Analysis of Qualitative Variables by Means of Three-way Analysis of Two Types of Quantification Matrices 301

Y. CHANDRAMOULI
Monitoring a Class of Discrete Point Processes 319

J. LAPPI AND R. SIEVÄNEN
Estimating a Linear Functional Relationship under Linear Constraints for Errors 335

I. MORGAN AND E. NEAVE
A Mean Reverting Process for Pricing Treasury Bills and Future Contracts 341
